

Welcome to our World of Casting

AFT Switzerland GmbH is a young company with **extensive experience** in the field of Low Pressure Die Casting (LPDC) of brass. Based in the northern Swiss Plateau, a region recognized as a leading center for the industry and services sectors, we **develop, manufacture and sell innovative low pressure die casting machines** for the manufacturing of faucets and sanitary fittings.

Close cooperations with leading Swiss foundries put us in the perfect position to **thoroughly test new components and machinery** in real operation and to develop them further in order to meet our high standards. This enables us to provide our customers with **sophisticated and well-tested solutions**.

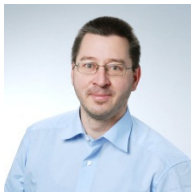

AFT Switzerland GmbH is also your competent partner for **spare parts, exchange furnaces**, services and overhauling of KWC low pressure die casting machines.

Our Strength – Your Advantage

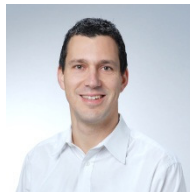

- + **Flexible** range of machines, tailored to meet the individual needs of customers
- + **Profound** know-how, always updated to the latest state of technology
- + **Quick** response time to inquiries and machine problem reports
- + **Prompt** spare parts service
- + **Competent and straightforward** support to your foundry problems
- + Several years of **international experience**
- + Swiss quality

Your contact persons

«We keep a constant focus on working with the **latest technologies** and the **highest quality**. **Excellent services** are always at the forefront of our thinking.»

Rolf Rangl
Chairman and Manager
Engineer / technician TS

Andreas Schaer
Manager

We would be pleased to demonstrate our variety of competence and expertise and to support you in all your projects in the field of machinery and technology for low pressure die casting of sanitary fittings made of brass.
